

# THINK -GT CAMP- ABILENE | JULY 8-12, 2024

Dr. Mary Christopher,  
Director/Owner CGL Consulting

AUSTIN ELEMENTARY  
3749 S. 23rd St., Abilene, TX 79605

Students completing K-5 in May 2024:  
9:00-12:00 and 1:00-4:00  
(can attend either morning or afternoon)

Students completing 6-9 in May 2024:  
9:00-4:00 (all day)

Documentation required for identification for  
Gifted and Talented program in a Local School  
or

Testing for identification available for \$80  
Send contact information to  
cgl.gtcamp@gmail.com to set up appointment

**Cost: K-5 \$150 | 6-9 \$230**

Limited scholarships available  
based on economic need

Email: cgl.gtcamp@gmail.com

**REGISTRATION OPENS  
IN FEBRUARY**

**EARLY STEPS FOR K-1:  
WONDERS OF THE WORLD**  
Bridges, cold houses, sandy sculptures, and  
skyscrapers ... Some of these structures  
are made by animals, humans, or nature.  
Explore some of the world's structures  
and learn about their architects. Create  
3-dimensional wonders of the world!

**PRIMARY FOR 2-3:  
WALK LIKE AN EGYPTIAN**  
Lost your mummy? Search the pyramids  
of ancient Egypt to find it! Can you read  
hieroglyphics? Learn how to crack the code.  
As an expert Egyptologist explore giant  
pyramids, ancient ruins, famous Pharaohs,  
and the great structures from world history.

**INTERMEDIATE FOR 4-5:  
COULD AN ANT TAKE A  
SHOWER?**  
Does size matter? Discover big reasons for  
building small and learn little things that  
count when building big. Build structures  
that survive the forces of weight, torque, and  
gravity. Study the physics and mathematics  
of scale and structure. Start building and  
discover what works!

**THINK 6-9:  
SHARK TANK**  
Can you navigate the shark-infested waters of  
influence? From politics, social justice, health,  
safety, sports, the arts, and entertainment,  
advocate for issues that matter to you. Create  
a compelling concept strategy and take a bite  
out of the status quo!

**ACTION CONTRACTIONS**  
Whiz! Bang! Zing ... through the air, into  
the cymbal, around the water glasses, and  
into the trash can! Analyze Rube Goldberg  
inventions and create new gizmos, gadgets,  
and contraptions. Take your plans from  
abstract ideas to reality!

**INSIDE OUT**  
Where are memories stored? How do you  
make up your mind? Why is it healthy to cry?  
What triggers a laugh? Life is an emotional  
roller-coaster ride! Make the most of the  
thrills and chills by exploring the complexities  
of the brain.

**UNDER PRESSURE:  
GO BIG OR GO HOME**  
Do you dream of being an engineer, building  
extreme structures that will not collapse under  
pressure? Design prototypes to withstand  
natural and man-made forces. All this will  
be water under the bridge once you learn the  
science of building big.

**THINK 2024: STRUCTURES**
