

What to do when I get my test result?

Negative Result-Student may immediately return to school if they have not had any vomiting, diarrhea or fever (without fever reducing medication) in the last 24 hours. If symptoms do not continue to improve or they worsen in the next few days, please contact your health care provider.

Positive Result- Student may return to school after 10 days have passed since the day after symptoms started. Siblings that live in the home will need to be immediately picked up from school and quarantined for 14 days. If they are unable to isolate from the positive sibling their 14-day quarantine period will not begin till after the positive sibling has finished their 10 days. (24 total days) It is also recommended that anyone living in the home also quarantine for 14 days per CDC guidelines.

You will need to contact the campus nurse for your child's return date and email the test results to her as soon as possible. Thank you for your cooperation and understanding in this matter.
